Continuation of 2. NOTE: The limitations of positioning the hand tool adjacent an injection mold and the nozzle tip positioned at a distance from the injection mold instead of the perform requires further search and/or consideration.

Continuation of 5. does NOT place the application in condition for allowance because: of the following reasons. Applicant argues that Settles fails to teach ice and not dry ice. Applicant's arguments are unpersuasive since Settles et al. teach using a cryogenic fluid. Further, refer to col. 1, lines 52-55 and col. 2, lines 45-48. Applicant argues that Settles fail to teach the gas mass flow ratio of as high as 1. Applicant is directed to col. 11, lines 1-17. Applicant argues that there is no motivation of combine the dry ice particles of Opel and the small particles of Settles. Applicant's arguments are unpersuasive since it is the prior art of Trampush and not Opel that is being modified by the teachings of Settles. Additionally, Settles et al. teach that the size of the water droplets can be varied to suit the user's purpose. Applicant further argues that Settles fails to teach the flow rate. Applicant is directed to the teachings of Swain to cure the deficiency..
